

Contents of volume 27

- No. 1 (pp 1-104) published September 30, 1987
 No. 2 (pp 105-218) published October 22, 1987
 No. 3 (pp 219-318) published November 12, 1987
 No. 4 (pp 319-416) published December 17, 1987
 No. 5/6 (pp 417-612) published February 11, 1988

In honour of Professor HJ Rehm 219

Mini-review

- Küenzi M, Archer L, Assi F, Brunius G, Chmiel A, Collins CH, Deak T, Donikian R, Financsek I, Fogarty LM, Frommer W, Hamp S, Houwink EH, Hovland J, Lagast H, Mahler JL, Sargeant K, Tuijnenburg Muijs G, Vranich P, Oostendorp JG, Treur A: Safe biotechnology. 2. The classification of microorganisms causing diseases in plants 105

Biotechnology

- Abe J, Bergmann FW, Obata K, Hizukuri S: Production of the raw-starch digesting amylase of *Aspergillus* sp. K-27 447
 Amin G, Khallafalla G, Doelle HW: Comparative study of D-xylose conversion to ethanol by immobilized growing or non-growing cells of the yeast *Pachysolen tannophilus* 325
 Bergmann FW, Abe J, Hizukuri S: Selection of microorganisms which produce raw-starch degrading enzymes 443
 Bock G, Benda I, Schreier P: Microbial transformation of geraniol and nerol by *Botrytis cinerea* 351
 Bonnerjee J, Pontin S, Hoare M, Dunnill P: Poly(ethylene glycol) precipitation and two aqueous phase separation of progesterone 11- α -hydroxylase from *Rhizopus nigricans* (Short contribution) 362
 Bronnenmeier K, Staudenbauer WL: Resolution of *Clostridium stercoararium* cellulase by fast protein liquid chromatography (FPLC) 432
 Brunerie P, Benda I, Bock G, Schreier P: Bioconversion of citronellol by *Botrytis cinerea* 6
 Buchert J, Viikari L: The role of xylonolactone in xylonic acid production by *Pseudomonas fragi* 333
 Champuvier B, Kamp B, Rouxhet PG: Immobilization of β -galactosidase retained in yeast: adhesion of the cells on a support 464
 Eckert G, Schügerl K: Continuous acetone-butanol production with direct product removal 221
 Favela Torres E, Baratti J: The effect of pH, temperature and sucrose concentration on high productively continuous ethanol fermentation using *Zymomonas mobilis* 121
 Fukuda H, Morikawa H: Enhancement of γ -linolenic acid production by *Mucor ambiguus* with nonionic surfactants 15
 Granot I, Aharonowitz Y, Freeman A: Cosolvent effect on

- Δ^1 -steroid-reductase activity of free and PAAH entrapped *Mycobacterium* Sp. NRRL B-3805 cells 457
 Guiseppin, MLF, van Eijk HMJ, Hellendoorn M, van Almkerk HW: Cell wall strength of *Hansenula polymorpha* in continuous cultures in relation to the recovery of methanol oxidase (MOX) 31
 Hatanaka H, Wang E, Taniguchi M, Iijima S, Kobayashi T: Production of vitamin B₁₂ by a fermentor with a hollow-fiber module 470
 Hilgendorf P, Heiser V, Diekmann H, Thoma M: Constant dissolved oxygen concentrations in cephalosporin C fermentation: Applicability of different controllers and effect on fermentation parameters 247
 Holló J, Miháitz P, Czákó L, Tóth J: Correlation of liquid dispersion and oxygen transfer in bubble column 260
 Holt RA, Cairns AJ, Morris JG: Production of butanol by *Clostridium puniceum* in batch and continuous culture 319
 Juneja LR, Hibi N, Yamane T, Shimizu S: Repeated batch and continuous operations for phosphatidylglycerol synthesis from phosphatidylcholine with immobilized phospholipase D 146
 Kawase Y, Moo-Young M: Influence of antifoam agents on gas hold-up and mass transfer in bubble columns with non-Newtonian fluids 159
 Kirimura K, Nakajima I, Lee SP, Kawabe S, Usami S: Citric acid production by the diploid strains of *Aspergillus niger* obtained by protoplast fusion (Short contribution) 504
 Kirkpatrick N, Palmer JM: Semi-continuous ligninase production using foam-immobilised *Phanerochaete chrysosporium* 129
 Klemp R, Schobert SM, Sahm H: Production of acetic acid by *Acetogenium kivui* 229
 Matsunaga T, Higashijima M, Nakatsugawa H, Nishimura S, Kitamura T, Tsuji M, Kawaguchi T: Conversion of phenylpyruvate to L-phenylalanine by immobilized *Clostridium butyricum*-alanine dehydrogenase-*Micrococcus luteus* under hydrogen high pressure 11
 Miličić S, Kremser M, Gaberc-Porekar V, Didek-Brumec M, Sočić H: Correlation between growth and ergot alkaloid biosynthesis in *Claviceps purpurea* batch fermentation 117
 Moresi M, Clementi F, Rossi J, Medici R, Vinti G: Production of biomass from untreated orange peel by *Fusarium avenaceum* 37
 Müller B, Schlichting E, Schügerl K: Reactive extraction of penicillin G in a pilot plant Karr-column III. Modelling and simulation of the extraction process 484
 Mustaranta A: Production of peroxidase by *Inonotus weirii* 21
 Nguyen A-L, Grothe S, Luong JHT: Applications of pullulan in aqueous two-phase systems for enzyme production, purification and utilization 341
 Oriol E, Raimbault M, Roussos S, Viniestra-Gonzales G: Water and water activity in the solid state fermentation of cassava starch by *Aspergillus niger* 498
 Poffe R, Mertens W: Heat-stable proteases of psychrotrophic bacteria isolated from cooled raw milk 437
 Pou-Llins J, Driguez H: D-Xylose as inducer of the xylandegrading enzyme in the yeast *Pullularia pullulans* 134
 Qureshi N, Tamhane DV: Production of mead by immobilized cells of *Hansenula anomala* 27
 Rodríguez-Aparicio LB, Reglero A, Ortiz AI, Luengo JM: Ef-

- fect of physical and chemical conditions on the production of colonic acid by *Escherichia coli* in a defined medium 474
- Röhr M, Kubicek CP, Zehentgruber O, Orthofer R: Accumulation and partial re-consumption of polyols during citric acid fermentation by *Aspergillus niger* 235
- Ropenga JS, Lenfant M: Bioconversion of isosorbide dinitrate by various microorganisms (Short contribution) 358
- Schär H-P, Gygax D, Ramos Tombo GM, Ghisalba O: Purification and properties of an acetyl specific carboxylesterase from *Nocardia mediterranei* 451
- Schmidt E: Bioconversion of 3-chlorobenzoate to 2-chloromuconate controlled by on line HPCL 347
- Sharma HSS: Bacterial spoilage of bleached-flax rove treated with sub-lethal concentration of biocides 492
- Sheppard JD, Mulligan CN: The production of surfactin by *Bacillus subtilis* grown on peat hydrolysate 110
- Soni BK, Soucaille P, Goma G: Continuous acetonebutanol fermentation: influence of vitamins on the metabolic activity of *Clostridium acetobutylicum* 1
- Suzuki T, Mushiga Y, Yamane T, Shimizu S: Mass production of lipase by fed-batch culture of *Pseudomonas fluorescens* 417
- Suzuki T, Deguchi H, Yamane T, Shimizu S, Gekko K: Control of molecular weight of poly- β -hydroxybutyric acid produced in fed-batch culture of *Protomonas extorquens* 487
- Syldatk C, Andree H, Stoffregen A, Wagner F, Stumpf B, Ernst L, Zilch H, Tacke R: Enantioselective reduction of acetyldimethylphenylsilane by *Trigonopsis variabilis* (DSM 70714) 152
- Takashima Y, Nakajima H, Sonomoto K, Tanaka A: Production of daunorubicin by immobilized growing *Streptomyces peucetius* cells 106
- Vining LC, Jensen SE, Westlake DWS, Aharonowitz Y, Wolfe S: Cephamycin production and isopenicillin N synthetase activity in cultures of *Streptomyces clavuligerus* 240
